## Description of Services

Between the dates of Aug 1, 2022 and Aug 30, 2022 Contractor shall establish a service pole at the location indicated in the attached [Lot Plan](#). The pole shall be established in accordance with Entergy corporations [Drawings D4-3 D4-4 and D9-2](#).

The pole shall be a pressure treated beam rated for long term soil contact. It shall be either a 6"x6" square beam or a 6" diameter round beam. It shall be at least 18 feet in length, with a minimum 4 foot buried length and a 14 foot above ground height. The pole shall be braced against pull with 2 pressure treated 2"x4"x12' boards attached at the ground to pressure treated 2"x4" boards driven at least 3 feet into the ground.

Attached to the pole between 4 and 6 feet above ground level there shall be a 100 Amp combo meter pan and load center. The panel shall be equipped with a 100 Amp main shut off circuit breaker and four additional 20 Amp circuit breakers (one for the security lights, one for each GFCI receptacle and one spare). Below the panel there shall be two 20 Amp GFCI receptacles with weatherproof in-use covers. This shall be grounded with two rods sunk 6' apart.

Attached to the pole at a height of 12 feet there shall be two adjustable angle security lights. Each fixture shall have a minimum of 40 watts of LED bulbs. The Contractor shall provide the Customer with details on the light fixture selected and the fixture shall be approved by the Customer prior to purchase.

## Scope of Work

Contractor shall provide all labor and materials, and perform all work necessary to the completion of the Electrical Services described above. Customer shall acquire the general building permit from the city. Contractor shall acquire necessary electrical permits from the city, make arrangements for inspection, and be present while an Entergy representative connects the pole to service.

## Payment

Customer shall pay \$1150 prior to the start of work. A second payment of \$1150 is due upon completion of the work.
