Re: 5500 Dauphine St
Reference Code: 1WVD23

Dear Ashley Shuler:

This letter confirms the actions of the New Orleans Historic District Landmarks Commission at its meeting Wednesday, September 7, 2022, concerning your application for the following work: Installation of visually prominent roof-mounted solar panels with visible conduit on a Contributing rated, one-story, single-family residential building.

At that time the Commission voted to:

Approve the request for installation of visually prominent roof-mounted solar collectors as per the proposed updated panel layout diagram with the proviso that all roof and wall-mounted visible conduit installed without a CofA is removed and that all necessary exterior conduit be installed such that it is minimally visible from all surrounding streets. The Commission recommended concealing the necessary exterior wall-mounted conduit behind the existing rear downspout or a new downspout located closer to the array, with minimal or no visible conduit installed on the roof surface. Please contact me at your earliest convenience to discuss the next steps in the HDLC review process so that a Certificate of Appropriateness for this work can be issued.

Should you have any questions concerning this matter, feel free to contact me at (504)658-7047 or Dennis.Murphy@nola.gov.

Sincerely,

Dennis Murphy
